PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years building production-grade web applications across SaaS, fintech, and healthcare domains. Specialises in React.js, Next.js (App Router, SSR/SSG), and TypeScript — with a track record of measurable impact: 40% faster page loads, 35% reduced load times, and 99.9% API uptime across live platforms. Experienced integrating AI-powered features, architecting scalable component systems, and leading cross-functional engineering teams. Strong focus on performance optimisation, accessibility, and shipping clean, maintainable code in Agile environments.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Next.js (App Router · SSR/SSG · React Server Components), React Native, Tailwind CSS, Shadcn UI, Framer Motion, CSS Modules

State & Data: Redux Toolkit, Zustand, TanStack Query (React Query), Chart.js

Backend & DB: Node.js, Express.js, PostgreSQL, MongoDB, MySQL, Supabase

AI & Integrations: AI/ML API Integration, Sanity CMS, Paystack, REST APIs

Testing: Jest, React Testing Library

DevOps & Tools: Git, GitHub Actions, CI/CD Pipelines, Vercel, Docker (Familiar), Postman

PROFESSIONAL EXPERIENCE

Walrus Tech — Benin City, Nigeria (Hybrid)

Frontend Engineer | Jan 2025 – Present

- Architected and led delivery of a multi-module SaaS platform (car rentals, artisan marketplace, real-time chat) with a cross-functional team of 3, owning frontend system design and API integration across both web and React Native mobile clients.
- Achieved 40% improvement in page load speed and 18% reduction in bounce rate by re-architecting the platform with Next.js App Router, SSR/SSG, Tailwind CSS, and Shadcn UI.
- Maintained 99.9% API uptime across 10+ integrated REST endpoints using TanStack Query and optimistic UI patterns within a microservices architecture.
- Accelerated feature delivery by 30% by establishing a CI/CD-ready component library, code review standards, and structured Agile sprint processes.

Standard Life Organization — Benin City, Nigeria

Frontend Engineer | Jun 2024 – Dec 2024

- Owned frontend architecture of a regulated core banking platform using React.js and TypeScript, establishing reusable component patterns adopted across the engineering team.
- Achieved 35% load time reduction during development through code splitting, lazy loading, image optimisation, and Webpack bundle size analysis.
- Identified and resolved 60+ frontend defects across browsers and devices during development, significantly stabilising the application before handoff.
- Collaborated with backend engineers and compliance teams in Agile sprints to design and deliver secure, regulation-compliant financial UI flows.

Self-Employed — Remote

Freelance Frontend Engineer | Jun 2022 – May 2024

- Shipped 10+ production web applications across healthcare, e-commerce, logistics, and education verticals, achieving 100% client retention.
- Built an AI-powered healthcare diagnostic system with symptom analysis and health metric tracking, integrating an AI/ML API backend deployed on Railway — live in production at healthcaresystemai.vercel.app.
- Developed a full-stack e-commerce storefront using Next.js, NextAuth, and Paystack checkout — achieved 90+ Lighthouse performance score in production.
- Engineered an offline-first service booking platform with background sync using JavaScript and MySQL, supporting 80+ monthly active users reliably.

KEY PROJECTS

Walrus Multi-Module SaaS Platform

codewithmonz.vercel.app · Live: thewalrustech.com

- **Stack:** React.js, Next.js (App Router), TypeScript, Tailwind CSS, Shadcn UI, TanStack Query, React Native, REST APIs (microservices)
- Led a team of 3 to architect and ship a unified platform spanning car rentals, artisan marketplace, and real-time chat across web and mobile — achieving 40% faster load times and 99.9% API uptime.

AI Healthcare Diagnostic System

Live: healthcaresystemai.vercel.app

- **Stack:** React.js, Next.js, Tailwind CSS, Express.js, AI/ML API, Railway
- Built an AI-powered symptom checker and health metric tracker with a dedicated Express backend on Railway powering the diagnostic API — demonstrates end-to-end AI feature integration in a production environment.

Frima Technology Platform

Live: frimatechnology.com

- **Stack:** Next.js (App Router), TypeScript, Tailwind CSS, Shadcn UI, Zustand, Sanity Studio, Paystack
- Delivered a full-service technology platform with custom CMS, blog, product management, and integrated Paystack checkout — production storefront achieving 90+ Lighthouse performance score.

EDUCATION

Higher National Diploma (HND), Computer Science

Auchi Polytechnic — Auchi, Edo State, Nigeria | 2017
